PROFILE

Aircraft Engine Maintenance Technician 1 supports **engine assembly and disassembly** for 4–8 engines per month, modular installation and removal, and **QEC build-up** on CFM56, LEAP, RR ENGINES and GE90 engines. Contributes to **AOG recovery** through 6+ engine turnaround events per month, incoming receiving, technical evaluation, and maintenance documentation. Works to **EASA/FAA standards** with multidisciplinary teams to help return aircraft to service safely and on time.

LANGUAGES

ENGILISH, AMHARIC, AFAN OROMO

PROFESSIONAL EXPERIENCE

ETHIOPIAN AIR LINES MRO
Aircraft Engine Maintenance Technician
06/2023 | ADDIS ABEBA , ETHIOPIA

- Participated in engine assembly and disassembly (such as LPT,HPT,HPC,LPC both rotor stators also AGB parts), including modular installation and removal
- Supported Quick Engine Change (QEC) build-up, splitting, and joining operations
- Assisted in AOG (Aircraft on Ground) situations, ensuring effective and efficient engine turnaround and aircraft re-delivery
- Performed incoming engine receiving, documentation, and technical evaluation
- Applied aviation safety protocols and maintenance standards in compliance with EASA/FAA regulations
- Collaborated with multidisciplinary teams to ensure timely and safe completion of maintenance activities
- Diagnosed mechanical issues and executed timely repairs, minimizing downtime for fleet operations.
- Collaborated with engineering teams to implement process improvements and optimize maintenance workflows.
- Trained junior technicians on best practices for equipment handling and safety procedures.
- Assisted in inventory management of tools and parts, ensuring availability for scheduled maintenance tasks.

EDUCATION

Diploma in Aircraft Power Plant Technician
Ethiopian Aviation University
06/2023 – 01/2024 | ADDIS ABEBA, ETHIOPIA

- Specialized in aircraft engine maintenance and overhaul
- Hands-on training on:
- Completed coursework in aviation safety procedures, engine inspection, troubleshooting, and technical documentation
- Applied safety protocols and proper documentation during incoming engine receiving and maintenance

Bachelor of Science in Software Engineering (In Progress) Addis Ababa University — *Dec 2023 – Present*

- Coursework includes programming, database management, and software systems
- Developing problem-solving and analytical skills applicable to aviation technology and maintenance systems

SKILLS

TECHNICAL AND SOFT
AIRCRAFT MAINTENANCE SKILL

- Aircraft engine maintenance
- Engine assembly & disassembly
- Quick engine change operations
- Engine receiving & technical evaluation
- Modular installation & removal

SAFETY & OPRETION

- Aviation safety protocols
- EASA compliance
- FAA compliance
- Aircraft turnaround support
- Multidisciplinary team coordination

INSPECTION & DIAGNOSITCS

- Aircraft maintenance manual interpretation
- Illustrated parts catalog usage

DOCUMENTATION & PLANNING

- Work order tracking
- Parts traceability

COMPLIANCE & STANDARDS

- Human factors in maintenance
- Aviation quality assurance

CERTIFICATES

- POWER PLANT TECHNICIAN
